

Learn My Students

A simple, private, zero-install flashcard tool for teachers to master student names and faces.

Version 1.0 · 2026-08-06

Privacy & Safety Guarantee (Safe to Share!)

Sharing `learn-my-students.html` and `README.md` together shares ZERO student information:

- `learn-my-students.html` and `README.md` are clean template files. They contain **only application code and instructions**, and contain **NO** student names, photos, student IDs, or roster data. You can safely email, AirDrop, or share these two files with any colleague.
- **All student data stays strictly on your computer.** When you import a roster, student names and photos are processed directly inside your web browser on your machine. Nothing is ever sent to a server, cloud service, or external website.

 **Data Responsibility Warning: NEVER share or upload your PowerSchool `.pdf` roster files or saved `.deck.json` progress files.** Those files contain real student names and photographs of minors and must remain strictly on your personal computer.

Quick Start Guide (3 Easy Steps)

Step 1: Open the Tool

Double-click `learn-my-students.html`. It opens instantly in your normal web browser (Safari, Chrome, Edge, or Firefox). You do not need to install any software or be connected to the internet.

 **Tip: Add to your Dock or Desktop App Icon - Safari (Mac):** Open `learn-my-students.html` → Click **File** in the Mac top menu → Click **Add to Dock**. - **Chrome or Edge:** Open `learn-my-students.html` → Click the **Install** icon in the address bar (or **Menu** → **Save and Share** → **Create Shortcut...** → **Open as Window**).

Step 2: Export your Roster from PowerSchool

1. Log into PowerSchool.
2. Select your class section and run the **Photos: 12/page** report.
3. Save the report as a `.pdf` file on your computer.  **Tip:** Name your PDF file after your class section (e.g. `AP_Bio_Period_1.pdf` or `Chemistry_A2.pdf`). The tool will automatically use the filename as your class name!

Step 3: Import & Practice!

1. **Import:** Drag and drop your `.pdf` roster file (or multiple PDF / `.deck.json` files at once!) into the drop zone below on the home page (or click **Browse Files**).
2. **Confirm:** Check the extracted student photos and names on the screen, then click **Confirm & Save to Memory**. If importing multiple PDFs at once, the app will conveniently step you through each roster confirmation in sequence!
3. **Practice & Navigate:**
 - Click **Study** to start a flashcard session.
 - Click **Class Grid** to view all student photos at once with names hidden.
 - Click **View Class Grid** at any point during a study session to flip over to the roster grid, then click **Resume Study** to jump right back into flashcards!
4. **Light & Dark Mode:** Toggle between Dark Mode and Light Mode anytime using the 🌞 **Light** / 🌙 **Dark** button at the top right of the header bar.
5. **Save Progress:** When you finish studying, click 📁 **Save Deck File(s)** to download `.deck.json` progress files to your computer. Next time you open the app, just drag your `.deck.json` files back in to resume right where you left off!

🏆 Performance Rubric Levels & Celebration Animations

At the end of every study session, the app calculates your overall accuracy and rewards your progress with silly animations, custom Web Audio sound effects (100% offline), and 5 distinct performance level badges:

Accuracy Score	Rubric Performance Level	Avatar Animation & Audio
95% – 100%	👑 Meeting with Distinction	Bouncing Royal Crown, Confetti Shower & Grand Victory Fanfare!
80% – 94%	★ Meeting	Animated Starburst & Celebratory Triumph Chimes
55% – 79%	🚀 Developing	Floating Rocket Sparkles & Ascending Arpeggio Sound
30% – 54%	🌱 Emerging	Gentle Sprouting Bounce & Cheerful 2-Tone Chime
0% – 29%	😐 Not Yet Evident	Silly Wobbly Shake & Playful Boing Sound Effect

💡 **Tip:** On the Session Complete screen, click **Study Again (Same Session)** to instantly re-run the same class drill!

💡 How the Flashcards Work (Leitner 5-Box System)

The tool uses a smart 5-box memory system so you spend time on the names you find trickiest:

- **New or missed names** stay in **Box 1** and appear frequently.
- **Correct answers** move a student up to higher boxes (**Boxes 2–5**), so you see them less often as you memorize them.
- **Mistakes** gently return a student to **Box 1** for review.
- **Flexible Practice Modes:** Test yourself with interactive flashcards (guessing the name from the photo), or use the **Class Grid** view with names hidden to practice recalling student faces at your own pace!

? Frequently Asked Questions (FAQ)

▼ 1. Can I drop in multiple class roster files at once?

Yes! You can drag and drop multiple PowerSchool `.pdf` files and saved `.deck.json` files into the drop box simultaneously. The app will immediately load all `.deck.json` files and queue up confirmation modals for each PDF roster.

▼ 2. Is any student information sent over the internet?

No, zero. Everything runs 100% locally inside your web browser. The tool works completely offline—you can even turn off Wi-Fi while using it.

▼ 3. Is it safe to share `learn-my-students.html` with other teachers?

Yes! `learn-my-students.html` is just an empty program. When you share `learn-my-students.html` and `README.md` with colleagues, you are only sending them the blank application. None of your student photos or names are inside it.

▼ 4. How do I save and resume my flashcard progress?

At the end of a study session, click  **Save Deck File(s)**. This downloads a small `.deck.json` file to your Downloads folder. To resume studying tomorrow, drag that `.deck.json` file into `learn-my-students.html`.

▼ 5. What format of PDF does PowerSchool need to export?

Use the standard PowerSchool **Photos: 12/page** export option. Student ID numbers are automatically stripped out during import for privacy.

File Reference & Sharing Safety

File Name	Description	Safe to Share with Others?
<code>learn-my-students.html</code>	The blank tool application	✓ SAFE TO SHARE (No student data)
<code>README.md</code>	This instruction guide	✓ SAFE TO SHARE (No student data)
<code>README.pdf</code>	Formatted PDF version of instructions	✓ SAFE TO SHARE (No student data)
<code>Learn-My-Students.zip</code>	Ready-to-send bundle of the 3 files above	✓ SAFE TO SHARE (No student data)
<code>LICENSE</code>	CC BY-NC-SA 4.0 license text	✓ SAFE TO SHARE (No student data)
<code>*.pdf</code> (rosters)	PowerSchool photo roster exports	✗ DO NOT SHARE (Contains student photos & names)
<code>*.deck.json</code>	Saved student flashcards & progress	✗ DO NOT SHARE (Contains student photos & names)
